

APPLICATION FOR WATER, SEWER, STORMWATER CONNECTION AND ADDITIONAL DEMAND APPROVAL

Fees and Costs

Service Approval Fee \$250 incl GST

All applications are subject to a service approval fee. This fee applies where there is an increase in demand. i.e a new connection where an additional house is built on a property or where a new house is built within the Kaikoura urban stormwater area where no physical connection is made. This fee covers checking to make sure systems can cope with the extra demand; pipe sizes and location of the new connection as well as updating and maintaining Council's records. This fee is charged for *each* service e.g. you will be charged \$750 incl GST if you are applying for one connection for water, sewer and stormwater.

In addition to the service approval fees and physical connection costs, there are additional costs associated with connecting to a rural water supply. These are detailed below.

The Service Approval fee and the Rural Water Supply charge (if applicable) are to be paid on application.

In addition to the fees and costs associated with the application and connection to the service, there are annual rates charges per water unit for rural supplies and annual charges for the urban supplies and connection to the sewer system. Please contact the Rates Officer if you would like to find out about changes to your rates.

Once approved, you may arrange for the physical work to be undertaken by a **Council approved contractor who will invoice you directly** for the works necessary for the connection.

Property Details

Name of Owner:

Contact Address:

Telephone No.

Email Address:

Location of Property to be Served

Street Address:

Legal Description:

Valuation Number:

Please indicate the service you require and the number of connections:					✓
Kaikōura Urban Water Supply - Domestic Use
