

KAIKŌURA DISTRICT COUNCIL ECONOMIC DEVELOPMENT STRATEGY

Five-year Action Plan (2026–2031)

This Five-Year Action Plan gives effect to the Kaikōura Economic Development Strategy by translating long-term strategic direction into a practical programme of actions for 2026–2031. Actions are grouped into three categories:

- **Council Led Foundational Actions** – Actions that Council and its partners will actively lead, coordinate, or directly deliver because they are critical to implementing the Strategy and creating the conditions for long-term success.
- **Partner-Led Actions Supported/Enabled by Council** – Actions that are primarily led and delivered by external organisations, businesses, community groups, or other agencies, where Council's role is to support, facilitate, advocate, coordinate, provide planning assistance, or help remove barriers to delivery.
- **Future Opportunities and Pilot Initiatives** – Potential future initiatives that will be explored, tested, or investigated before any commitment to delivery.

The Action Plan reflects both the priority and maturity of different actions, as well as Council's role in delivery. Council-led Foundational Actions are the highest-priority initiatives and will be the primary focus of implementation during the first one to two years, as they create the conditions for achieving the Strategy's longer-term outcomes. Support/Enable actions are primarily delivered by partners, with Council providing advocacy, coordination, planning support, or other assistance where appropriate. Future Opportunity actions identify projects that may warrant further investigation or development but do not represent a commitment to implementation at this time.

This Action Plan does not approve projects, commit funding, or predetermine outcomes. Progression of actions remains subject to feasibility, partner commitment, funding availability, environmental considerations, community support, and future Council decisions through Long Term Plan, Annual Plan, District Plan, and other statutory planning processes. The Action Plan will be monitored and reviewed over time to respond to changing circumstances while maintaining the long-term direction of the Economic Development Strategy.

Action description	Action type	Lead entity	Pillar	Key partners	Timeframe (Years 1–5)	Resourcing required	Alignment with other plans	Key benefits	Indicator of success	Delivery Confidence Rating
Establish Enterprise Kaikōura as a business and investment leadership structure with an agreed Terms of Reference, membership model, and annual work programme, including speakers and workshops. It will be the primary KDC tool to Coordinate business engagement, investment attraction, diversification initiatives and productive economy forums	KDC led/ Foundational KDC to: - set up the core group - develop the governance structure - arrange the first meetings and forums	KDC	2.
