

FORM NESC 2 -ASSESSMENT OF ACTIVITY STATUS FOR DISTURBANCE OF SOIL

SECTION 1-SCALE OF ACTIVITY

Earthworks (soil disturbance-including earthworks related to utilities)

1. The volume of the disturbance of soil of the piece of land will be more than 25m³ per 500m² Yes No
2. In the course of the activity, the soil to be taken away will be more than 5m³ per 500m² of soil per year? Yes No

If you answered yes to either question you will require resource consent. Please contact the Kaikoura District Council planning department for more information and an application for resource consent.

If you answered no to please go to Section 2

SECTION 2-MITIGATION AND DURATION

1. Ensure that controls are in place to minimize the exposure to humans to mobilised contaminants:

- Are in place when the activity begins? Yes No
- Are effective during the activity? Yes No
- Are effective until the soil is reinstated to an erosion-resistant state? Yes No

2. Reinstatement of the soil to an erosion-resistant state within 1 month once the activity is complete (the activity means the soil disturbance not the proposal)? Yes No

3. Dispose of all contaminants at a facility authorised to receive soil of that kind? Yes No

4. Complete the activity (as listed in section 1 part 1 of this form) within 2 months? Yes No

5. Ensure the integrity of a structure designed to contain contaminated soil or other materials must not be compromised? Yes No

Note: If you have questions about how to satisfy the requirements in questions 1-5 please seek professional advice.

If you answered no to any of the question in Section 2, you will require resource consent. Please contact the Kaikoura District Council planning department for more information and an application for resource consent.

If you answered yes to all questions in section 2, you will not require resource consent as long the activity remains as described in Sections 1 and 2 above.

SECTION 3

Please note than any inaccuracies may result in the person undertaking the activity to be in breach of the Resource Management Act 1991 and/or exposed to liability if the site is subsequently found to be contaminated, including being liable for remedial works. Failure to comply to the requirements of the Resource Management Act may lead to fines or prosecution.
